CHARTER FUNDING CALCULATION

FOR SPECIAL EDUCATION STUDENTS

STEP 1: Take a school district's budgeted expenditures for special education and **SUBTRACT** the school district's expenditure of

federal special education funding

state funding for early intervention services

STEP 2: **MULTIPLY BY** **16%** of the school districts average daily membership

16% is used because it represents the average percentage of students in PA who require special education.

STEP 3: **ADD** to the school district's tuition rate for non-special education students.

EQUALS The school district's charter school tuition rate for regular education students
